

Modular Triangular Dish

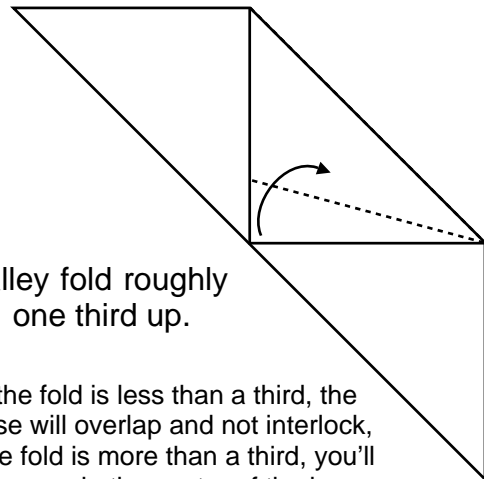

Valley Fold in half.

Valley fold in each corner up and unfold.

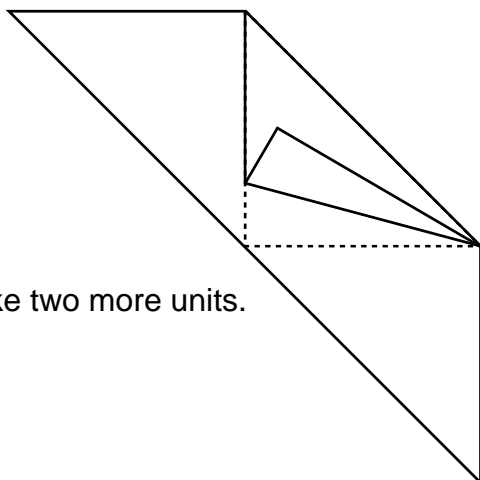

Valley fold both layers down.

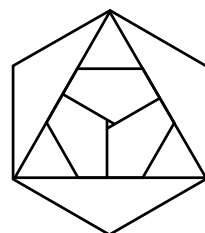

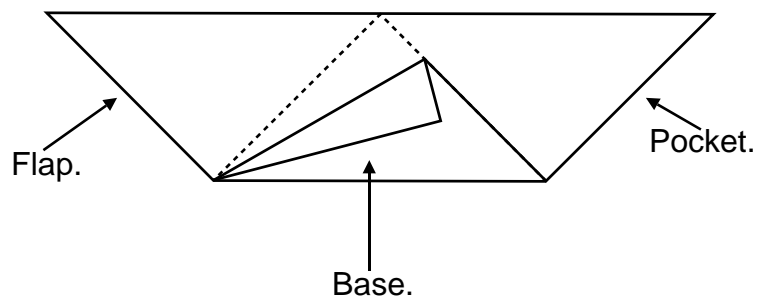

Valley fold roughly one third up.

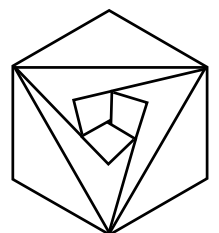

If the fold is less than a third, the base will overlap and not interlock, if the fold is more than a third, you'll get a gap in the centre of the base.

Make two more units.

View from underneath

Insert the flap of each unit into the pocket of the unit next to it.
Complete the dish by interlocking the base.
